

Dwiki Riyadi | Mobile Developer

wiki.riyadi@gmail.com - (62) 878-4681-3575 - www.linkedin.com/in/dwikiriyadi

Summary

Results-driven Mobile Developer with 6+ years of experience in software development, specializing in building robust applications with Kotlin and Flutter. Began career as a self-taught full-stack developer (Laravel, Vue.js, jQuery, Java Android, Adobe XD), independently establishing best practices through hands-on experimentation. Passionate about leveraging diverse technical expertise to deliver cutting-edge mobile solutions and committed to continuous learning in a rapidly evolving tech landscape.

Skills

Architecture & Design: SOLID Principles, Design Pattern, Software Architecture, System Design, Clean Code

Mobile: Kotlin, Flutter, React Native, Kotlin Multiplatform, Mobile Architecture, Android Development

Practices: Code Refactoring, Problem Solving, Agile Methodologies, API Integration, UI Generation

Work Experience

Mobile Developer

PT. KB Finansia Multi Finance - Jakarta

August 2024 - August 2025

- Led architectural redesign and refactoring of internal applications, improving scalability and development velocity.
- Developed an innovative tool for automated UI generation from data models, enhancing front-end efficiency.
- Contributed to Kotlin Multiplatform (KMP) architectural design and adapted cross-platform principles to Flutter development.
- Explored and implemented complex module integration (FlutterFlow, Flutter, Native) strategies for hybrid application development.
- Provided critical bug fixing and troubleshooting across multiple mobile projects, ensuring application stability.

Android Native Developer

Logee by Telkom Indonesia - Jakarta

Juni 2020 - Desember 2023

- Applied SOLID Principles and advanced architectural patterns in Kotlin Android development for a large-scale B2B e-commerce platform.
- Significantly improved development efficiency and code quality through code simplification, refactoring, and creating reusable utility functions.
- Defined the technical stack and architectural blueprint for a new unified application, integrating multiple services.
- Developed and implemented core item distribution features for a complex, unified mobile application.

Mobile Developer

Amigo Group Indonesia - Yogyakarta

April 2019 - November 2021

- Led development of a React Native application for a barcode-scanning transaction system, demonstrating iterative testing methodologies.
- Developed and successfully deployed a high-impact Flutter-based member application, currently in active use.
- Transitioned from Full Stack to specialized Mobile Developer role, demonstrating adaptability and focused skill growth.

Fullstack Developer

Idekite Indonesia - Pontianak

February 2018 - February 2019

- Developed and maintained full-stack web applications utilizing Laravel, Vue.js, and jQuery for diverse client projects.
- Designed user interfaces and experiences, including front-end development and Adobe XD prototyping.
- Implemented and managed Android mobile applications using Java.
- Pioneered independent experimentation with tools and frameworks to establish internal best development practices.

Education

Bachelor's degree, Computer Science

STMIK Akakom Yogyakarta

April 2020

Associate's degree, Computer Science

Politeknik Negeri Pontianak

September 2017
