Work Experience

Android Native Developer

Logee - Jakarta — Juni 2020 - Present

- Implemented clean and efficient code using Kotlin, following best practices and coding standards to build high-quality, scalable, and user-friendly applications.
- Actively participated in code reviews to maintain code quality, improve efficiency, and adhere to coding standards.
- Stayed up-to-date with the latest Android development trends and technologies to drive innovation and deliver cutting-edge solutions.
- Contributed to the improvement of development processes and workflows to increase efficiency and productivity.

Flutter Developer

Amigo Group - Yogyakarta — April 2019 - November 2021

- Developed and maintained cross-platform mobile applications using Flutter framework, ensuring a consistent user experience across Android and iOS platforms.
- Integrated RESTful APIs and backend services to enable seamless data exchange and enhance app functionality.
- Stayed up-to-date with the latest trends and advancements in Flutter development, incorporating new features and functionalities into app projects.
- Demonstrated strong problem-solving abilities and a proactive approach to address technical challenges and meet project objectives.

Fullstack Developer

Idekite Indonesia - Pontianak — February 2018 - February 2019

- Collaborated with cross-functional teams to gather requirements, design architecture, and develop scalable web applications using Laravel framework.
- Implemented responsive front-end interfaces using jQuery and Vue.js, ensuring seamless user experiences across multiple devices.
- Developed robust RESTful APIs to facilitate data exchange between the front-end and back-end systems.
- Utilized Android app development skills to create intuitive and user-friendly mobile applications, meeting project requirements and industry standards.

Education

Bachelor's degree, Computer Science — **2020**

STMIK Akakom Yogyakarta

Project

Logee Order

Developed a native Android application for retail store to connect with distributors to easily source and purchase products, streamlining the retail procurement process.

Amigo Member

Developed a Flutter application for member to seamlessly exchange points, vouchers, and access exclusive promotions with feature-rich membership application, designed to enhance loyalty program experience.

Antrian Online RSUD dr.Abdul A

Developed a native Android application for patient to get queue tickets and receive real-time notifications of queue number
